

I am Sue Cole, an educator at the middle school level, a public access producer, a nonprofit computer lab coordinator, and a producer of web pages. It is very important that members of the unlicensed access community have access now. Low power is just as important as high power. Access to this space for both high power and low power mobile devices is essential, in my opinion.

I endorse the issues raised by NYCWireless, et al. I agree with the objection to the professional installer requirement and the inclusion of identity beacons in mobile devices.

Thank you for considering my comments. I will be watching to see if you make the right decision on these matters.

Sincerely,

Sue Sende Cole
